

allow the four districts to caucus in order to bring about some rhyme or reason (inaudible) as to how we accomplish what the motion attempts to do. If you don't adopt the motion you have no problem of course provided you might elect more than the number in the motion from one district. My only point is the point of order how do we do it?

SPEAKER: Senator Waldron.

SENATOR WALDRON: (Machine wasn't on - couldn't hear) to me that by adopting this resolution which is trying change his statue to come into some conflict because part of the statue it says there shall be two members elected at large from three different areas. Now if you elect like the speaker and the vice-chairman of the Legislative council from one area, then you're only, by passing this resolution, the way I understand it and I could be wrong, then you'll be limiting that one area which I don't know which district if the first or second district, to one other member when the statue said they are entitled to two other members and I just like to ask Senator Stromer, how he's going to solve that conflict with the rest of the statue?

SPEAKER: Senator Stromer.

SENATOR STROMER: Mr. Speaker, I think that perhaps what we should have done and I should have had this motion on the desk before we started any of the voting so we could have discussed it and had it cleared at that time, you know before, but I think Senator Waldron's point is well taken, in this particular matter.

SPEAKER: Senator Mahoney.

SENATOR MAHONEY: Mr. Speaker, to broaden what Senator Waldron has brought out to the floor this morning, or this afternoon, we have a similar problem that if the Chairman of the Executive Board which we have already elected, and say the Chairman of the (inaudible) that come from the same district again we would have two on the higher echelon of the legislature, but not a member of the executive board, so I think you should look at the fact that the executive board being made up could cause some problems in any one of these areas in future years, but I would also mention to that the legislature this afternoon debates this, we will have a similar situation when it comes down to the Committee of Committees, which I could explain that at a later time.

SPEAKER: Senator Simpson.

SENATOR SIMPSON: Mr. President and members of the legislature, first of all I would be suspicious of a rules change which is against a statue, this entire set up is by statue and I don't believe by going to a rules that we can make this change, if we were going to make it in the first place and if it was even legal then I think we should have done it before there were any elections and I think now that it really could have no force and effect in the election today, besides the very points that I make, we are doing in the rules against what is done by statue and this is by statue the executive board.

SPEAKER: Senator Stromer did you have any comment?

SENATOR STROMER: Well, I think that in one point raised prior to was considering the chairman of the committee on committees, this actually would not come under this particular motion, because the chairman of Committee on Committees is no longer according to the law, a member of the Executive Board.

SPEAKER: Senator Mahoney did you wish to say anything? Stromer.

SENATOR STROMER: Mr. Speaker I think the vote was taken before some of this discussion which I think should have been done prior to the calling of the vote and you have not announced the total of the vote, I think, a suggestion might be made if we are ready to, for this particular motion to go ahead, clear the board, and re-vote on this particular motion then.
